

## Abstract:

An inorganic particle-containing composition comprising:

- (A) inorganic particles;  
 5 (B) a binder resin; and  
 (C) at least one plasticizer selected from the group consisting of compounds represented by the following formula (1):

wherein  $R^1$  and  $R^4$  are the same or different alkyl groups having 1 to 30 carbon atoms or alkenyl groups,  $R^2$  and  $R^3$  are the same or different alkylene groups having 1 to 30 carbon atoms or alkenylene groups,  $m$  is an integer of 0 to 5, and  $n$  is an  
 15 integer of 1 to 10,  
 and compounds represented by the following formula (2):

wherein  $R^5$  is an alkyl group having 1 to 30 carbon atoms or alkenyl group.

A transfer film and a plasma display panel production process using the composition are also described.
